Environmental Policy:

At Bruster's Real Ice Cream, store #313, in Annapolis, MD we strive to achieve and maintain the environmental standards detailed in the Sustainable Annapolis initiative and the Environmental Stewardship Certification for Restaurants.

Our approach to environmental concerns is twofold. The store leadership shall address larger, "big picture" initiatives and seek to implement suggestions from all staff. Store front line staff shall be mindful of this policy and attempt to carry out their day-to-day duties in a manner that lessens the environmental impact of Bruster's Annapolis.

Examples of the "big picture" initiatives that the leadership team will work on include: Maintaining compliance with all applicable environmental regulations. Monitoring our waste disposal and looking for ways to increase recycling. Working with Bruster's procurement and vendors to make food and supply delivery more efficient and enhance offerings of environmentally-friendly cleaning supplies, paper goods, and food products. Choosing landscaping that conforms to the Environmental Stewardship standards. Maintaining our foodservice equipment so that it is always running as efficiently as possible.

Examples of steps that hourly staff may take to enhance our environmental position include: Providing no more than two napkins per item served unless a customer requests more. Bagging orders only when a customer requests it. Making sure sinks are turned off when not in use. Securely closing cooler and freezer doors when not in use. Making sure waffle irons are not on when not needed. Turning off fluid cooler on ice cream making equipment when not in use. Practicing proper portion control to cut down on food waste.

We, as the owners and operators of Bruster's Annapolis, welcome suggestions from our vendors, staff and customers about how our operation may lessen its environmental impact. Those suggestions may be e-mailed to brustersannapolis@gmail.com.
